Other International Equities	1.79%
Other	4.04%

Although the model portfolios are for clients with a particular attitude to risk, individual funds may be higher risk than the overall portfolio and some of lower risk; this is to achieve an overall portfolio in line with the risk. Data sourced through Financial Express (Analytics). All reasonable precautions have been taken to ensure that the information contained is correct. Past performance is based on a model and not an actual portfolio and should not be seen as a guide to future performance, the price of shares and the income from them can fall as well as rise. Please note that the actual performance of your portfolio may differ due to a difference in charges and timing of any investments, redemptions and switches.

Investment Strategy

In September 2016 we took the decision to move an element of the portfolio into cash, this was against the backdrop of realising some of the gains until new themes were to emerge. Given this situation, we continue to feel there is uncertainty in the bond market, which is as highlighted above, but we do feel there is scope to increase the element of equity from the cash and maintain the risk of the portfolio within the parameters and tolerances.

Fund changes this period

In line with the above comments we have reduced the holdings in the following fund.

Holdings Reduced:

- Blackrock Cash D (5%).

New Holding Added:

- Pictet-Global Environmental Opportunities (5%)

Aim of the Fund

The fund seeks capital growth by investing principally in securities of companies that are active throughout the environmental value chain. The fund favours companies operating in services, infrastructures, technologies and resources related to environmental sustainability. The investment universe is not restricted to a specific geographical zone.
